Why does Weed Badger® sell factory-direct?

We made the decision to supply growers directly from the factory many years ago. Why? It wasn't just because many dealers were overcharging our customers. No, it was worse than that. They tried to isolate you, the grower, from us, the manufacturer. They didn't service the machines as

well as our factory technicians. We also need your feedback. Grower suggestions have made Weed Badger the top-notch equipment that it is today. We promise to listen and keep that close connection with you.

Where is my local Weed Badger® dealer?

Can you purchase from your local dealer? Most likely. They are usually willing to mark up most any product and sell it to you. It's your choice, and we'll work with it. First ask some tough questions. Do they stock parts? Do they have a machine in stock? Are they Weed Badger® service experts? If so, you've found a winner. If not, they are just another equipment peddler. If

you want the lowest price we can bypass all the peddlers and equip you with machinery direct from the factory. Buying your Weed Badger® factory-direct gives you the highest quality precision in-row tillage and mowing equipment at the very best price available.

Where is the Weed Badger® manufactured?

Weed Badger® is built in the Heartland by skilled, experienced professionals. Weed Badger® is manufactured in the south-central region of North Dakota. The factory is very close to the center of the North American continent. Machines are efficiently shipped all over the world from this point. In most cases, growers from the United States, Canada, Australia, and other countries call the factory directly to purchase their machines. The region is recognized for its strong work ethic and pride in quality production. Workers at our factory are no exception. More than half the total staff has more than 10 years experience. Real people, really close, give real-world help really fast. Answers to service questions are immediate. Feel free to call us with any service or adjustment question, anytime. When you call directly to the

Weed Badger® factory you talk to a living, breathing, knowledgeable person who is trained and interested in helping you.

How long has Weed Badger® been in production?

Since 1979 Weed Badger® has helped growers set up successful weed control programs. We've custom outfitted thousands of Weed Badger® machines for vineyards, orchards, nurseries, landscapers, berry farms, farm shelterbelts, government agencies, and universities. Weed Badger® in-row rotary tillage and mowing equipment has been designed with the needs of growers in mind. Dealing factory-direct has allowed grower input to assist us in developing a wide range of Weed Badger® models, accessories, attachments, and optional packages.

Speak to one of our factory in-row tillage and mowing experts. Give us information about your specific operation—row width, plant spacing, tractor type, and horsepower, etc. Then we'll make sure you get the right equipment and options for the job. You can order your equipment with confidence knowing that our years of experience are working for you. You really can get 99.99% perfect weed control.

Where will I get parts and service help for the Weed Badger®?

We offer lifetime free customer service. Immediate expert service help and access to repair parts is one of our strengths. We designed the equipment. We manufacture the equipment. Help is as close as the telephone, fax, or your email's send button. Our shelves always have parts. We continue to service equipment sold back in 1979. We're reliable. It doesn't matter whether you live

in the U.S.A., Canada, Australia, South Africa, Mexico, South America, or anywhere else in the world. We can ship parts rapidly to meet your needs. Don't forget that you can ask questions or order 24 hours a day by email or fax. You'll absolutely love having the factory-direct advantage.

Where can I see a Weed Badger® demo?

Demos on your farm would add \$1,500 or more to the cost of your machine. If we bring a machine out, of course it will work. From the factory we have the advantage of using brand new equipment all the time. We would naturally completely check and double-check every detail of the machine before we got it close to your place. We also have more than 25 years of experience operating equipment we build. We can easily make any machine appear to sing and dance for a demo or field day. In other words, we would stack the deck to our favor to make sure the demo goes well...meaning a factory demo would prove nothing. We have participated in field day demos in the past. Growers watch and then proceed to examine our video playing at the event because it shows them more than one model machine working in a picture-perfect setting.

If you really want to know if our equipment works you'll want to go and talk to owners that

paid for machines to find out. Ask them if they have been satisfied over the years with our customer service and factory-direct way of doing business. You will get real-world feedback from someone who has used the equipment – possibly for many years. Most growers tell us they would keep \$1,500 in their pocket and simply talk to another grower who's an owner. There are thousands of happy Weed Badger® owners and most likely one near your area with conditions and crops similar to yours.

Some growers still prefer to go through a local dealer that offers those services. You're welcome to do so. Just give your local farm equipment dealer our toll-free number. Bear in mind that the dealer who buys from us factory-direct will bring the machine out, but he will charge you a hefty retail price for doing so. We are happy to do it either way. The choice is yours.
